SAMPLE DISCHARGE INSTRUCTIONS

FICTIONAL TRAINING DOCUMENT — NOT FOR CLINICAL USE

Patient: Alex Morgan (fictional) **Visit ID:** SAMPLE-10482 **Discharge date:** October 28, 2026

This document is invented solely for testing the CareBridge document-upload and extraction workflow. It does not describe a real patient and must not be used to make healthcare decisions.

1. Visit summary

You were seen at Example Community Clinic for evaluation of a minor wrist injury after a fall. The examination and imaging did not identify a fracture. You are being discharged home with instructions to arrange routine follow-up and monitor your symptoms.

2. Follow-up plan

• Contact Example Community Clinic to arrange a follow-up appointment in 7–10 days. If you already have an appointment, confirm the date and time with the clinic.

• If you were referred to a specialist during your visit, check the referral paperwork for the clinic's contact details and next steps.

3. Instructions listed at discharge

• Keep the wrist support in place as directed by the clinician who treated you. If you are unsure how long to use it, contact the clinic for clarification.

• Avoid activities that worsen your discomfort until you have received further guidance from your treating clinician.

• The discharge paperwork does not list a new prescription medication. If you were given separate medication instructions, follow up with the prescribing clinician or pharmacist if anything is unclear.

4. When to seek help

Seek urgent medical assessment if you develop new numbness, fingers that become pale or blue, rapidly increasing swelling, severe or worsening pain, or any other symptom that concerns you. For an emergency, contact local emergency services.

5. Questions and contact information

Example Community Clinic (fictional)
Phone: 555-010-2040
Hours: Monday–Friday, 9:00 a.m.–5:00 p.m.
If you have questions about the instructions, contact the clinic. Do not rely on this sample document for medical care.

CareBridge development note: A future checklist should preserve the source wording and page reference, distinguish explicit tasks from general advice, and flag ambiguous instructions for review.
